

We will sell lines for sorting and packaging carrots and onions for the fresh market.

We offer for sale complete lines (capacity 10T / h) for washing, mechanical and optical sorting, calibration, polishing and packaging of carrots and onions for the fresh market. The sales offer applies to complete lines with conveyors, platforms, electrical installations, control cabinets and other necessary equipment. The main producer of machinery and equipment included in the line is Herbert and Ishida. The line is in excellent technical condition (it has processed about 1000 T in total and is fully operational). It is possible to run and check the efficiency of devices before buying. The line includes more than 140 machines and devices. Year of production 2012.
